1/2 peck, \$1.00. P. P. weight, 4 lbs.
1 peck, \$1.75. P. P. weight, 7 lbs.

growing Bulbs in Water and Pebbles

Another very fascinating method. Here, too, fancy glass or china dishes can be used. Fill the receptacles nearly the top with pebbles, then fill with water until it is level with them, press the bulbs gently into the pebbles and stand erect; the roots will wind their way through the pebbles and secure a firm hold for the bulbs. Water must be changed as it is taken up by the roots for nourishment. The bulbs are adapted to this method.
